Portland Mayor Charlie Hales
1221 SW 4th Avenue, Room 340
Portland, Oregon 97204

23 September 2014

Dear Mayor Hales:

Mailed
no response

This is a follow up to the meeting requests I submitted – one in person yesterday, and one online a couple of weeks ago. Due to what appears to be ongoing distribution of images/recordings taken by devices placed illegally inside my home, crowd-stalking, and computer and email security breaches, this situation feels extremely urgent and I've had a terrible time getting it resolved.

as of 3/12/15

Apologies in advance if I seem to repeat myself – I've been trying to resolve this for so long now, I feel like a broken record. I hope that we can change this inertia, and soon.

1

I need help mediating and resolve this spying and intellectual theft situation which I attempted to report to Portland Police last MLK Day (1/20/14). I now very much believe that Police and other government agencies were directly involved, but I can't understand why. I need to know the gist of what happened, how 40 years (40 years in Chris' case – 5 years in my case) of illicit images and recordings were, and continue to be, managed and controlled, whether downloads ever made available anywhere, what is being done to remedy the problem now, and what process we need to go through in order to receive just compensation from those who manufactured, distributed and/or accessed these images and recordings without our knowledge or permission.

If you or anyone else have already taken action to help and protect us - thank you. I deeply appreciate it. However, it is very difficult to know exactly what is going on, and that is part of my problem. I am very concerned about this due to the duplicitous nature of my opponent and the general ease of stealing, reproducing, and re-distributing digital files.

If my apartment has been bugged with the city, state, or federal government's tacit or explicit approval, and unless there is an excellent reason for us to be watched by the government, corporations, and various industries, **the appropriate government agency should help us debug** (This would *not* be the police, sheriff, or fire department.) I certainly can't imagine any good reason for us to be watched by the half the world as we seem to have been. If for some reason this surveillance has been deemed necessary on some level because we are a national security threat, I'd like to find out why we were so deemed, and what I can do to change that. Even then, I don't understand why these images were so widely distributed. I do believe that [REDACTED] were among those directly responsible for gathering, editing, and distributing the images.

Aside from the general offensiveness and psychological torture of this, the blacklisting is and has been a serious problem for me. I have no income, and no prospects. Some men leer at me on the street and/or continue to stalk me with phones. Meanwhile, I have heard my bedroom conversations and activities repeated and referred to in local publications and on national television several times, most recently on the Jimmy Kimmel show less than a month ago. *Update: happened again today 9/25!*

I think under the circumstances, it is appropriate for an elected government official to help mediate, or initiate mediation, and quickly. It seems pretty clear that the feds have been aware of this situation, and that the trauma-based "medical" treatments I received in California were somehow connected to research developed from CIA Project MK ULTRA. So there is clearly a lot going on here. **It certainly is attempted "mind control" to assert that those in my household present some kind of exception to international human and U.S. first amendment and civil rights laws, and to expect me - or anyone - to accept such an assertion.** Chris' mind has been well-controlled, sadly. Still, I am pretty sure even this does not except him from international human rights laws.

I believe that my attempts at bettering myself socially, professionally, and economically have been deliberately sabotaged several times over the past five years via various string-pulling manipulations. I can hardly afford this. I have some recurring disability issues (chronic pain flare ups) but well beyond that, my professional fields of writing, music, and media design are all fields where everyone seems to have been exposed to the illicit recordings, photos, etc. broadcast from my home and street. This is incredibly disheartening. I don't understand why I have been treated this way.

I don't even know what was broadcast, exactly, and to whom. This is very disconcerting. I just know that it involved images from my bathroom (including my toilet), my bedroom, my teenage daughter's

bedroom and bathroom, my computer hard drive, and all my confidential medical information. And that all these things have been the subject of coded ridicule for a very long time. I know that everyone who writes for any newspaper, does graphic design, owns a business, etc. seems to have had access to my life.

At this point, I feel professionally, financially, and socially stranded. Aside from that, I am concerned about my safety and my daughter's safety, physically as well as psychologically and professionally. I believe that many of the more egregious and inappropriate things that occurred, occurred specifically because certain individuals or groups believed - perhaps correctly - that they were operating above or beyond the law. If it is true, I definitely need an explanation, or preferably, I need them held accountable. I also believe there was a profit motive dating back the full 40 years as is indicated by the scene where a boy in India "sells the elephant" in the 1974 James Bond movie "Man With The Golden Gun."

I understand that there may be "good" reasons this very old-fashioned "game" was carried on for as long into modern times as it was. But the specific way it's being conducted seems cruel, disgusting, deviant, and dangerous. Those in control of the illicit footage clearly wanted to use it to manipulate my behavior, and when I didn't do what they wanted, attempted to use the recordings to psychologically, socially, and professionally destroy me. I already asked for them to be investigated, and I would like to if it has been followed up on, and if so, what is the status of that investigation. Unless they are decisively stopped from doing so, I believe that this cartel will continue to carry out actions against us. Similarly, if the blacklisting isn't actively and decisively turned around, it will never end.

I was the head of my household when California sheriffs kidnapped and held me last January. Even being locked up for those five days did severe damage, especially with what happened to my car and savings account in the process. (I can list at least three ways the 5150 detention was illegal, and I have printed a narrative and kept all associated paperwork.)

Also very important: **I need someone to carefully but plainly tell Chris the truth.** Find an appropriate way to do it, and do it quickly. The lack of honesty from everyone around us is extremely stressful and isolating. People I thought were friends turned out to be duplicitous in an intricately manipulated situation. Psychologically blinding and socially binding a person as we have been, is very cruel and dangerous - it's like trying to navigate the wilderness on crutches and in a blindfold. I think we deserve some honesty and protection from our elected officials at the very least.

My car, music, and professional reputation have been ruined by sabotage and blacklisting. I've been lied to by friends, family, doctors, journalists, my (now former) lawyer, police. Meanwhile, I have no money, no income for the past two years, no job, no access to legal help. I am professionally drowning because my civil liberties have been trampled for five years straight, and after almost a year of fighting against it to the best of my ability, there seems to be no end in sight.

Because this situation is clearly known to my government, and may well have been facilitated by the government, I think it is appropriate for the government to help protect us as citizens. **We need to learn the truth and achieve a fair resolution which involves a decisive and complete destruction of all illegally obtained images and recordings, accountability from the perpetrators, and just compensation for what we have suffered.** Chris has been buried and exploited for 40 years, but now at 61 he is still healthy enough to continue recording and performing, if we could just resolve this in time. He is a fantastic artist and musical genius who truly deserves to be heard, and to be able to professionally and socially interact with other artists. **We don't have forever.**

This could potentially be very easy to fix. The perpetrators clearly include the wealthiest humans and corporations on the planet, from pharmaceutical companies to Wall Street banks. They can easily make the necessary changes and amends, whether they "want" to or not. Is it not a matter of simply standing up for what is right and legal, against what is wrong and illegal? We're all in the middle of this mess, whether by choice, necessity, inheritance, or proximity. I am not interested in being "judged" by those who created this situation. I am interested in seeing THEM judged according to the applicable laws.

4

I need my elected representatives to show courage and willingness to stand up and do what is right in this very unusual situation. I still want to achieve an amicable resolution. I need assistance in the form of information, protection, and mediation, and I need it as soon as possible.

Please meet with me. Please help us. Thank you.

Sincerely,
Erika Meyer
