OBD complaint, request to open investigation

Erika Meyer <ekm@seastorm.com>

To: information@obd.oregon.gov

Hi - Thank you for calling on Friday in response to my emails, and for sending me a copy of the original paperwork. I did not recall filing the complaint originally in July 2023. I agree that there was a typo in the return address on the original complaint form, a copy of which you sent to me. Going back to my paperwork, I found a follow up email from July 18 which I am attaching, so with that, and with having filed a second complaint in November, it really seems disappointing that no one saw fit to either call me, or email me, or compare the the ONE mistyped address with the multiple versions of my correct address - or even to answer one of my emails from 2023 - to ensure that I was informed of what was going on with this SERIOUS MALFEASANCE - in Oregon dentistry & oral surgery.

With that water under the bridge, here we are, more than a year later, and no closer to relief, much less justice.

The letter that was sent to me was a form letter, assuring me that the matter was "thoroughly investigated." This is clearly false. Had the matter been "thoroughly investigated" I would have been interviewed, radiographs would be examined or repeated, and other tests would have been done to determine the veracity of my claims. In fact, they couldn't even get a letter to me.

I'm very much aware of how widespread this practice of biomedical implantation is in dental work, and how long it's been going on. (About 100 years.) And that it's still, nevertheless, criminal. And I know the board knows. And I believe that their shoving this under the rug is misprision of felony. Even if it is the FBI who is doing this crime, it's still a crime.

At this point, what I would like is the following:

1. I would like to know if there is a way to appeal this decision. In other words, have I now exhausted all my administrative options for relief?
2. I would like to request documents associated with this investigation. Please direct me to the process that will enable me to make this request.

Thank you,

Erika Meyer
