Hi Mr Sisk, we spoke on the phone April 21 regarding a message/complaint I filed about aircraft (drone) activity. You asked me to send original files as attachments. I don't know if META data is important - if so, and/or if you need less compressed versions of some of the files let me know and I'll go back to my archives.

The drones in question seem to be involved in frequency based (directed energy) attacks that are harming me and others. There seem to be a lot of people in my community suffering and dying young from aggressive cancers and sudden heart attacks which I suspect may be linked to this activity, and probably also to weaponized ground antennas.

My suspicion is these drones are linked to police and/or FBI and that the attacks they're doing are financed and possibly linked to certain private citizens via some type of network. In essence, after years of observation of different patterns, I believe the police, hospitals, various businesses, certain citizens, and the city and county government are involved in a murder-for profit scheme, and that it's being used to finance construction of homes, acquisition of goods, and even public works projects.

I've filed complaints with FBI and Department of Justice, but all my reporting seems to do is put me and my family members in increasing danger. I'm desperate to have these directed energy attacks to my brain and body stopped. Torturous attacks are also being directed to my husband who is badly suffering from what I'm certain is radiation-induced cancer, and I've been given to understand my daughter is also being attacked with an intent to kill.

No matter how much evidence I can provide, police and FBI steadfastly refuse to make a report of this crime. They, and doctors working with them, have opted instead to deliberately misdiagnose me with mental illnesses as a means to smear me and dismiss my complaints without investigation. From my perspective, this behavior is more indication that the police and FBI are themselves linked to the activities.

To try to get the word out, and to try and get help as quickly as possible, I've been putting together a website <https://seastorm.com/anatomy/>

Additional videos showing evidence of specific drone activity are here <http://seastorm.com/anatomy/aircraft/drones/> - I'm now working on the sections showing evidence of covert medical implants <https://seastorm.com/anatomy/medical/implants/> and injuries from frequency based weapons <https://seastorm.com/anatomy/medical/injuries/> (a work in progress)

With regards to reporting, you can see on this page https://seastorm.com/anatomy/aircraft/drones/drone_videos_2019.html (April 4 entry) how I have, several times, tried to track flights in real time using this radar tracker <https://www.radarbox24.com> to find that the flights are not being publicly tracked (seems congruent with the idea they are drones)

The most recent videos on the list of attached videos were taken right outside the door of my residence at 305 NE 61st Ave, and have a time stamp in the file names. 20210421_192829 is a video taken on April 21, 2021 beginning at 7:28pm. 20210421_193503 begins at 7:35pm. From these videos, hopefully you can also confirm whether these aircraft are being tracked, recorded, reported. Regardless of whether they're being tracked, they are doing harm.

I hope you are able to help, or to direct me to someone who can help. Thank you,

Erika Meyer
